2021

The Craft Promise

Craft has been a leader in the design and development of functional sportswear for world-class performances since 1977. This experience is central to our Corporate range, which just like our other garments are based on advanced fabric development and tough tests in labs and authentic environments. The collection includes a wide range of functional trainingwear and stylish, athletic everyday garments suitable for company profiling. Together with these items, you and your colleagues can build a strong, unified identity as well as perform optimally during the next training session.

Baselayer

Midlayer

Protection Layer

The Craft Principle

An intensive training session will result in the body producing a considerable amount of sweat. This is just how it should be and a confirmation that you are pushing your limits. If you are not wearing functional clothes, the sweat will remain in place and block the pores, causing your body heat to rise. Eventually the clothes will turn into a damp, cold and heavy “envelope”, relentlessly hampering your performance. If you are wearing functional clothes, however, the skin will stay dry and you will be able to perform at an ideal working temperature. Craft’s functional clothes, in up to three layers, create a perfect microclimate and provide the basis for optimal performance. Each layer is equally important and complements the rest of the chain.

Baselayer

Baselayer that efficiently transports moisture away from the skin and distributes it on the outside of the garment, where it either evaporates or is passed on to the next layer. For optimal performance and comfort, Craft baselayer should always be worn underneath your outer layers, regardless of weather conditions.

Midlayer

Craft midlayer provides insulation and warmth while transporting moisture and excess heat to the next layer or into the surrounding air. When the thermometer creeps downward, this layer enables you to retain valuable body heat without reducing your freedom of movement.

Protection Layer

The third and outermost layer is your shield against the elements and provides comfort and performance no matter the conditions. Transcending the laws of logic, craft protection layer protects against rain, wind and cold at the same time as it releases surplus heat and moisture from the layers underneath.

The Craft Collection

Core

Believes everyone is an athlete and provides a high level of functionality that makes it possible for all people to enjoy sports achievements. This is the starting point for our offer.

Advanced

Combines sport-specific features with exceptional functionality to support enthusiastic athletes in their athletic progress.

Pro

Featuring a supreme level of functionality and high-tech innovations, Pro targets professional athletes who demand nothing but the best in all aspects of their training and racing.

Outdoor

Outdoor allows you to experience nature and all its everyday adventures with great confidence. This comprehensive collection includes jackets and pants made of 3-layer shell fabrics, isolating as well as stretchy softshell – high functionality, good weather protection and comfort.

Footwear

For four decades we've been running in the woods, on the streets and through fields across the world, gaining mileage and know-how during every sweaty and strenuous stride. Craft shoes focuses exclusively on the running experience, offering exceptional grip, anatomic shape and great energy return.

Outdoor

Indoor

V150 Engineered

MEN	1908265	EU 39 ½ - 50 ½, UK 6-15
WOMEN	1908264	EU 35 ½ - 42, UK 3-8

Size guide, P152

Mid-distance road-running shoe that offers excellent flex and support, which makes it a great choice also for speed intervals and longer runs. V150 Engineered comes with a fully engineered mesh upper for optimal freedom of movement, comfort and performance. V Energy Foam in the midsole's forefoot area provides high-caliber energy return, elevating your stride and giving that extra push to help you reach your goals. The shoe is built on a last design that follows the natural contours of the foot and comes with flexibility in the right areas to allow the foot muscles to work and perform as they are intended to. Furthermore, V150 Engineered features neutral stability to offer the right level of motion control for runners with normal pronation or a neutral foot movement.

Material: Upper Mesh: 60% Polyester 40%Polyamid; Insole: EVA with single mesh; Lining: 100% Polyester; Outsole: 100% Rubber; Midsole: 100%EVA; Insole: EVA with single mesh

- LIGHTWEIGHT ENGINEERED MESH UPPER ENSURES GREAT BREATHABILITY
- V ENERGY FOAM IN THE MIDSOLE'S FOREFOOT AREA PROVIDES HIGH-CALIBER ENERGY RETURN
- LAST DESIGN THAT FOLLOWS THE NATURAL CONTOURS OF THE FOOT
- NEUTRAL STABILITY FOR OPTIMAL MOTION CONTROL FOR RUNNERS WITH NORMAL PRONATION
- V-FLEX ZONES IN THE OUTER SOLE INCREASE STABILITY AND PROVIDE NATURAL FLEXIBILITY
- VIBRAM RUBBER OUTSOLE OFFERS SUPERIOR GRIP ON WET AND DRY SURFACES

Baselayer

Craft is a pioneer in performance baselayer and offers functional garments that provide excellent body-temperature management during exercise in any condition. The fabric structures and knitting techniques interact to efficiently transport moisture away from the skin and distribute it on the outside, where it either evaporates or is passed on to the next layer for optimal performance and comfort.

Dry

Warm

Wool

Accessories

SEGMENTS

Craft Temperature Control System

In what temprature will you exercise?

-30°

-10°

0°

10°

30°

At which activity level will you exercise?

Easy to light

Medium to hard

Hard to intense

Match your temperature with your activitly level to find the right king of baselayer.

Dry is our super-efficient baselayers made from synthetic fibers that help you stay dry during intense workouts in warmer temperatures. Contrary to popular belief, a baselayer is always a good idea, even if the thermometer is showing red.

This is what you want if you plan on working out when it's cold. These baselayers are made of the best of best when it comes to synthetic fibers, keeping you both warm and dry, no matter if you're going for a new PB or just taking a walk in the park.

Wool. You either love it or hate it. This baselayer collection is based on natural fibers and keeps you warm in really cold conditions, even when wet. The garments are super versatile and work just as well for high-intensity training, especially since the material has odor-resistant qualities!

Developed together and for the worlds elite athletes. This is the best baselayers we have to offer.

Icons

Some products really stands the test of time. And through the years they have become true classics that you will always find in our range.

Nordic Ski

How can we benefit from the nearly 50 medals won by Craft athletes during the last two Olympic winter games? Well, it's all about the details. By working with some of the best cross-country skiers on the globe we have learned how to design and build the optimal cross-country product.

Accessories

ESSENCE

Timeless. Recycled.

ESSENCE are the sustainable choice that adds another green dimension to cycling. Recycled fabrics, solution dye and a clean, timeless design combined to make every ride an eco-friendlier experience. Can be easily mixed and matched with your other bicycle garments.

SOLUTION DYE

The eco-friendly dyeing process

Solution dye is an eco-friendly dyeing process that saves lots of water, chemicals and energy compared to traditional dyeing. In the process, the dyeing is carried out by adding the color pigments to the spinning solution prior to the fabric weaving. As a result, the pigments become an integral part of the fiber, offering superb color fastness. Compared to traditional dyeing, Solution dye uses 75% less water, 67% less chemicals and 39% less energy.

The Bib fabric

Sustainable techno-fabric made with Econyl® - 100% regenerated polyamide fiber from post-consumer materials - which, when tested in real life conditions proved to be two times more resistant to chlorine, suntan creams and oils than competitors' fabrics; these amazing results are achieved thanks to its innovative construction and to the presence of LYCRA® XTRA LIFE™.

Essence Light Wind Jacket

CORE

MEN	1908813	XS, S, M, L, XL, XXL, 3XL

Sustainability

We truly believe that acting as a responsible business – fully committed to sustainability and human rights – will contribute to lasting success.

Our sustainability work and processes are implemented in close collaboration with Craft's parent the New Wave Group (NWG). While Craft has the full responsibility for the product range, we share a number of important and crucial functions with the NWG on a daily basis, such as factory audits and shipping routines.

In addition, through NWG we are a member of several programs, initiatives and collaborations aimed at improving sustainability and workers' rights.

For more information about our sustainability initiatives and CSR policies, please read New Wave Group's latest Sustainability Report.

Crafting eco-friendly concepts

During the last years, Craft has launched several environmentally friendly products and collections. Almost all collections today contain products made from recycled polyester.

While we have implemented a number of sustainable initiatives on a product level during the last seasons, our ambition for the future is even higher. Within the coming years our goal is to take full responsibility for the entire value chain. In a few years, all Craft garments will be fully or partially made of sustainable fabrics. In addition, all elements of the labels, hangtags and packaging will be made of recycled, recyclable and/or bio-degradable materials.

Good design

We create the best products for our users, while minimizing our environmental impact. We are committed to steadily increasing the use of more sustainable materials in our manufacturing process and products. At the same time, we are driven by a sustainable mindset in the entire design process – developing high quality products that don't need to be replaced as often and that come in classic, timeless colorways with a long lifecycle.

TEAMWEAR

For world champions and everyday heroes

Craft athletes work out for freedom, for happiness and for progress – to improve quality of life. We are people of all ages and genders who prioritize physical movement and appreciate design and functionality. We are all athletes, from the everyday active to the world record holder.

Jonathan David
KAA Gent

Branded fabrics & features

VENTAIR™ X

VentAir represents the latest in cutting-edge fabric systems. It's a highly advanced system that offers water and wind protection in combination with excellent ventilation and moisture transport. The system includes three fabric categories with unique characteristics for unique demands.

VENTAIR™ X

Fabric that provides excellent water protection, ventilation and comfort for a wide range of sports. The dedicated athlete's choice.

VENTAIR™ X wind

Fabric that offers excellent wind protection, ventilation and comfort in windy conditions.

Primaloft® Silver Insulation is engineered for a full spectrum of benefits – millions of air pockets trap body heat in extreme conditions and lack of bulk means great freedom of movement for the activity. The Primaloft® proprietary treatment ensures excellent performance as the insulation maintains its warmth properties even in wet conditions. On top of all that, Primaloft® Silver Insulation is designed for durability in a lightweight design for active applications, packability, breathability, and softness.

GORE Windstopper® products are totally windproof and offer reliable protection from the wind-chill effect. As a result the body can devote more energy to the activity than to regulating the microclimate. This means you can stay outside longer enjoying your favorite activity in the widest range of weather.

GORE Windstopper® includes features as snow and water resistant, outer shell GORE Windstopper® Membrane & innerlayer conditions.

The V-series shoes feature a Vibram Megagrip 3 mm rubber outsole for excellent grip on rock and stone. Excellent grip on slippery surfaces. Gravel-free design. Self-cleaning lugs. V Flex design for natural flexibility.

Follow the care instructions to extend the function, shape and lifespan of the garment.

General advice

Taking good care of your garment results in better function and protection, allowing you to focus on your training. Don't wash your functional garment more often than necessary; it saves both the clothes and the environment.

Follow the instructions on the product's care label and use an environment-friendly detergent (dose carefully).

To ensure that your garment maintains its shape and to avoid wear and tear, always close zippers, Velcro openings, buckles and buttons before washing.

Don't use fabric softener when washing functional clothes. Softener encapsulates the fibers and thus ruins the fabric's ability to transport moisture.

Material-specific advice

POLYESTER

Wash with similar colors. Clothes with prints should always be washed inside out. Remove the garments from the washing machine immediately after finishing washing. Line dry the garments, preferably in a drying cabinet. Do not tumble dry; it's bad for the environment and wears out the clothes.

WOOL

Some of our knitted products contain wool. Wool has the amazing capacity to self clean outdoors in fresh air, most effectively in damp weather under the cover of a roof. The preferred washing temperature for wool garments is 30 degrees (also called cold wash). Spin carefully. Don't tumble dry. Shape and line dry the garment after washing.

LINED SYNTHETICS & SHELLS WITH PROTECTIVE SURFACE

Air the garment after use. If it's dirty and/or sweaty — wash. Not washing a dirty garment can reduce its breathability. Always follow the care instructions. Line drying works okay but adding heat will reactivate the water-repellent surface of the outer fabric. Use a drying cabinet or iron on low heat.

It's important to re-impregnate your garment to maintain the surface's protective properties. This can be done either in the washing machine or with a spray. Remember to follow the instructions on the waterproofing and ensure that it's designed for breathing garments. It's important for all types of waterproofing to be exposed to heat after application, in order to maximize the effect.

JACKETS WITH DOWN FILLING

Don't wash down garments more than necessary. Often it's enough to clean the garment with a damp cloth. However, down garments can be washed as long as you do it the right way. Always follow the care instructions on the garment and use rather too little detergent than too much.

Down garments should be washed inside out and tumble-dried with tennis balls until they are completely dry.

Turn the garment inside out and make sure there's plenty of room for the jacket in the drum. To reduce wear, always close zippers, Velcro openings and buttons before washing. Choose a delicate cycle, 30°C or 40°C.

Place the washed jacket in a dryer along with three tennis balls. The balls help to distribute the down evenly and to regain its fluffiness. Dry the jacket on low temperature for as long as possible. You can help the down to spread evenly by removing the jacket every now and then, shaking it and loosen up any clumps.

The drying process usually takes longer than you think. Before you end the drying, make sure the jacket is completely dry, light and fluffy. Then hang your down garment on a hanger with lots of space around it.

It's possible to dry without a dryer, but it takes more work. You need a warm, well-ventilated room and have to shake the jacket frequently and thoroughly throughout the drying process to prevent the down from clumping.

What does it mean?

ACRYLIC	see Synthetic fibers.	REGENERATE FIBRE	is the name of art silk developed of the cellulose fibre. Most common is viscose, modal and acetate.
BONDED FABRIC	are two different layers of fabric combined into one.	RIBBING	is a pattern in which vertical stripes of stockinette stitch alternative with vertical stripes of reverse stockinette stitch. It gives more elasticity.
CANVAS	is an extremely heavy duty fabric, often made of cotton. Used for making sails, bags, shoes and other functions where sturdiness is required.	RINGSPUN FABRIC	means of taking the rougher feel of raw cotton and making it smoother to the touch. Essentially, the process for producing ring spun fabric involved using a spinning method, such as on a spinning wheel, to create a slightly finer thread.
CVC	(Chief Value Cotton) is a mix of high quality cotton and polyester, where cotton is more than 50%.	RIP-STOP	is a light-weight nylon fabric with inter-woven ripstop reinforcement threads in a crosshatch pattern.
EASY CARE	is an expression that means easy to handle and manage through time. The product has been treated mechanically or with chemicals to make ironing or pressing easier. The treatment will fade away over time.	SINGLE JERSEY	a fine fabric most often used to make t-shirts.
ELASTANE	is a common name for a synthetic fiber known for its exceptional elasticity. One of the most famous is LYCRA®.	SOFT SHELL	is a term used on soft materials with the ability to block water partially, and comes with different degrees of water resistance and breathability.
FLEECE	is the common name for a soft fabric, usually made of polyester. Have a short pile and the fabric is both warm and breathable.	SYNTHETIC FIBERS	is a collection name of all fibres that have been artificially produced out of synthetic polymers. Most common is polyester, polyamides and acrylic.
GAUGE	is the unit of measure that refers to the knitting machine's fineness size.	TACTEL	is a trademarked brand produced by Invista. It has a cotton-like feel.
INTERLOCK	is a joined closely knit textile fabric, mostly used as lining.	T/C	is a short name for polyester/cotton mix, where polyester makes ca 65%.
COMBED COTTON	is a soft version of cotton, a method where the shorter fibres have been removed leaving the fibres well paralleled. The yarn takes colouring better, will get stronger and softer.	TWILL	comes from a method of weaving textiles that have a high wear and tear quality. Jeans, work wear and some shirts are often made from twill.
CARDED COTTON	compared to combed cotton, this process is not as smooth, having more fibres "sticking out" and is often a little bit rougher.	VISCOSE	see regenerate fibres.
LYCRA®	is a registered brand from INVISTA, see Elastane.	VELCRO®	is a brand name of fabric hook-and-loop fasteners, but it's so well known that it has become the generic term for a type of product.
MESH	is a "net" looking textile, often used in the inside of sport garments.		
MICRO FLEECE	is the same as fleece but with a shorter pile. See fleece.		
OPEN END SPINNING	is a technology for creating yarn without using a spindle. It's not suitable for thin yarn.		
PIQUÉ	is a weaving style, normally used with cotton. Characterized by raised parallel cords or fine ribbing.		
POLYAMIDES	see Synthetic fibers.		
POLYESTER	is the most important fiber of all synthetic fibers, see synthetic fibers.		
PU	is an abbreviation of Polyurethane, which is a water resistant film (or coating) used for example on outdoor jackets and bags.		

Sizing & measurements

Use the chart below to determine your size. If you're on the borderline between two sizes, order the smaller size for a tighter fit or the larger size for a looser fit. If your measurements for chest and waist correspond to two different suggested sizes, order the size indicated by your chest measurement.

How to measure yourself

MEN

WOMEN

JUNIOR

A. CHEST

Wrap a tape measure evenly around the fullest part around the chest under your arms.

B. WAIST

Wrap a measure tape around your natural waistline.

C. SEAT

Standing with your feet together, measure around the fullest part of your hips.

D. SHOULDER AND SLEEVE LENGTH

Measure from the lowest part of the neck, over the tip of the shoulder and down the outside of the arm, past the elbow and to the wrist. Keep the arm slightly bent.

E. INSIDE OF LEG

Standing with your feet together, measure from the crotch all the way down to the floor. Don't forget to stand as straight as possible. You may have to ask a friend to help you.

F. LENGTH

The total length of your body.

Footwear Size Chart

How to measure your feet

STEP 1
Stand up straight on a hard surface with your heel against the wall and a piece of blank paper taped to the floor.

STEP 2
Have someone mark the longest part of your foot (referred to as heel-to-toe length) on the paper with a pen or pencil, or measure yourself if necessary. Repeat with the other foot, as sizes may be different on left and right foot.

STEP 3
Use a ruler to measure the heel-to-toe length you marked for each foot.
